

SKYLINE  WINDOWS

97 Series Window Wall

FIXED / CASEMENT / AWNING

WINDOW WALL

Window wall systems are glazing that is traditionally framed from slab to slab and employ a sill tank or receptor for drainage as well as a head receptor to accommodate live-load movement of the building structure. Window wall systems are commonly used in ribbon window configurations or punched openings.

BENEFITS

- **IMPROVED SITE LOGISTICS**
- **SPEED OF INSTALLATION**
- **HORIZONTAL INSTALLATION PROVIDES COMPLETE ENCLOSURE FLOOR BY FLOOR**
- **REDUCED MATERIAL & LABOR COST VERSUS TRADITIONAL BY-PASS CURTAINWALL SYSTEMS**
- **DESIGN FLEXIBILITY**
- **EXCELLENT AIR, WATER & THERMAL PERFORMANCE**
- **SUPERIOR QUALITY CONTROL VERSUS SITE BUILT SYSTEMS**
- **FLOOR EDGE SLAB COVERS, IN EITHER METAL OR GLASS, CAN BE USED FOR THE LOOK OF A CONTINUOUS SLAB BY-PASS CURTAINWALL AT A SIGNIFICANTLY REDUCED COST**

97 SERIES WINDOW WALL

Skyline Windows' 97 Series of window wall products offer a variety of depth and configurations to meet each project's aesthetic and performance needs with combinations of fixed lights, out-swing vents and/or awning vents as required by design. Skyline Windows' 1700 Series terrace doors can be seamlessly incorporated into the window wall system to provide access to balconies, terraces, or roof-top amenity spaces.

BENEFITS

- **STRUCTURAL GLAZING FOR LONG-TERM DURABILITY**
- **PRESSURE EQUALIZED FRAME DESIGN**
- **EUROPEAN MULTI-LOCK HARDWARE & CENTER "GOOSE-NECK" GASKET DESIGN**
- **WIDE VARIETY OF STANDARD & CUSTOM HANDLE DESIGNS AVAILABLE**
- **HIGH PERFORMANCE, DURABLE ARCHITECTURAL FINISHES**
- **INTEGRATED TERRACE DOORS DESIGNED AS PART OF OVERALL SYSTEM**

OUR LEGACY

A BRIEF LOOK INTO OUR HISTORY

Quality, innovation and customer service have been the guiding principles of Skyline Windows since Sam Kraus founded it as a roofing and waterproofing business in 1921. As Skyline evolved, the dedication to craftsmanship and service was passed down from generation to generation.

In the 1950s, under the direction of Sam's son, David Kraus, Skyline entered the window replacement business, then a new and burgeoning industry. Eventually, Skyline began manufacturing our own window systems to meet the expectations for high quality and performance that our customers demanded.

When third generation and current Chairman of the Board Steven Kraus came to Skyline in the 1970s, he moved the company into new and broader product offerings. The integration of state-of-the-art European hardware systems and development of historic replacement window designs are hallmarks of the innovations seen under his stewardship. Fourth generation and current CEO, Matt Kraus, is poised to lead Skyline Windows into the future.

1921

Sam Kraus establishes his business as a roofing & waterproofing company

David Kraus expands the business & begins installing replacement windows

1950s

1960s

Establishment of New York City's Landmarks Preservation Commission & start of the historic window replacement business

Skyline begins manufacturing windows that incorporate quality craftsmanship & custom detailing

1970s

1990s

In order to meet market demands, Skyline purchases a new manufacturing plant

Skyline's headquarters moves to current location - Bronx, NY

2000s

2014

Skyline purchases a second production facility, providing over 100,000 square feet of manufacturing space

Skyline Windows celebrates 100 years in business!
